

Excel Automation Toolkit (v2.5.0)

Commercial License & Activation Guide

1. Licensing Architecture & Policy

Each standard commercial license is cryptographically bound to **designated PC hardware** to guarantee workstation security and enable 100% offline operation without corporate firewall conflicts, proxy issues, or external server dependencies.

Commercial licenses are fulfilled **instantly (within seconds, 24/7)** via our official online Self-Service Claim Portal. You no longer need to wait for manual email processing.

Immediate Unrestricted Access

You do not have to wait for your permanent key to start working. The toolkit includes a built-in **14-day evaluation period** with all nine modules, processing engines, and advanced features fully unlocked from the moment you first run the application. There are no file size caps, row limits, or watermark restrictions during this evaluation.

2. Instant Step-by-Step Activation Procedure

Step 1: Retrieve Your Machine ID

1. Launch `ExcelAutomationToolkit.exe` on the computer where you plan to use the software.
2. In the top-right header, click the **License Status Badge** (or select **About → Activate License** from the top menu).
3. The Activation Dialog will appear displaying your unique hardware-generated Machine ID.
4. Click **Copy Machine ID** (the identifier follows the format `MCH-XXXX-XXXX-XXXX-XXXX`).

Step 2: Claim Your Key Instantly Online

1. Open our official **License Claim Portal** in any web browser:

<https://excel-automation-toolkit.pages.dev/claim>

1. Enter your **Polar.sh Order ID / Receipt ID** (from your purchase confirmation email or receipt invoice).
2. Select your purchased edition:

- **Pro / Lifetime Edition:** Paste your **Machine ID** into the target field.
- **Enterprise Edition (Multi-Seat):** Paste the list of Machine IDs for your workstations (minimum 10 seats required, up to your purchased quota).
- **Universal Key Edition:** No Machine ID required (activates on any workstation).

1. Click **Generate & Claim License Key**. Your cryptographic key (or batch keys for Enterprise) will be generated and displayed immediately on screen.

Step 3: Apply Your Permanent Key in the Application

1. Copy the generated license key (formatted as **EATK-[EDITION]-[PAYLOAD]-[SIGNATURE]**).
2. Return to the **Activate License** dialog in **Excel Automation Toolkit** .
3. Paste the key into the input field and click **ACTIVATE LICENSE**.
4. The status badge will immediately change to **Licensed**. Activation is 100% offline and permanent.

3. Alternative: Email Support Fulfillment

If you cannot access the web claim portal from your corporate network or require manual assistance:

- **To:** **viztumdev@gmail.com**
- **Subject:** **License Activation - Order #[Your Polar Order ID]**
- **Body Information:**
 - Your **Machine ID** (copied from Step 1)
 - Your **Polar Order ID** or purchase receipt invoice
 - **Turnaround:** Our support desk will verify your order and deliver your signed key within 24 hours.

4. License Tiers & Upgrades

- **Pro Edition (\$29):** Single-workstation commercial license bound to 1 designated PC.
- **Lifetime Edition (\$49):** Permanent single-workstation commercial license including all future v2.x updates, Advanced Accounting formatters, and the Workflow Pipeline engine.
- **Enterprise Edition (From \$390 • Min. 10 Seats):** Multi-seat volume license with hardware-locked keys for corporate teams, custom company watermarks on generated reports, and Advanced Accounting formatters.
- **Universal Key Edition (\$799):** Hardware-unbound commercial license that activates instantly on any machine without hardware fingerprint locking.

5. Frequently Asked Questions

- **How quickly do I receive my license key?**

Instantly. The Self-Service Claim Portal generates your signed cryptographic key in seconds, 24 hours a day, 7 days a week.

- **Does day-to-day operation require an internet connection?**

No. Excel Automation Toolkit is 100% offline. License generation and verification use local public-key HMAC-SHA256 cryptography. The software never transmits spreadsheet data, telemetry, or network requests to external servers.

- **What happens if I replace or reformat my computer?**

Because each commercial license is securely locked to designated hardware, license transfers are managed directly by our support desk to protect your purchased seat quota. Simply email your original Polar Order ID and your new Machine ID to viztumdev@gmail.com . We will revoke the previous hardware registration and issue a replacement key for your new workstation at no additional charge.

6. Support & Resources

For license inquiries, workstation transfers, or volume licensing:

- **Self-Service Claim Portal:** <https://excel-automation-toolkit.pages.dev/claim>
 - **Support Email:** viztumdev@gmail.com
 - **Product Store:** https://buy.polar.sh/polar_cl_bVH2wmBY9DqUMeTI6TAkXxW5hXYHh9gzufmqM3j3xMa
 - **Release Version:** v2.5.0 Commercial Release
 - **Platform:** Windows 10 & 11 (64-bit)
-
